- (1) Based on 100 percent of births in selected States and on 50-percent sample of births in all other States; see Technical Appendix.
- (2) Based on 50-percent sample of births.
- (3) Based on data for 49 States and the District of Columbia which reported Hispanic origin on the birth certificate.
- (4) Based on data for 48 States and the District of Columbia which reported Hispanic origin on the birth certificate.
- (5) Based on data for 47 States and the District of Columbia which reported Hispanic origin on the birth certificate.
- (6) Persons of Hispanic origin may be of any race.

NOTE: The median age in table 1-5 is the value that divides the birth rate distributions into two equal parts, one-half of the values being less and one-half being greater. It is computed from birth rates in 5-year age groups which eliminates the effects of changes in the age composition of the childbearing population over time. The mean age in table 1-6 is the numeric average. Thus, due to the different ways in which the median and mean ages are computed as well as the adjustment of the median, the numbers in tables 1-5 and 1-6 would be expected to differ.
