¹Rates computed by relating the number of events to women of all ages to women aged 15–44 years.

²Rates computed by relating the number of events to women under 15 years to women aged 10–14 years.

³Rates computed by relating the number of events to women aged 40 years and over to women aged 40–44 years.

⁴Spontaneous fetal losses from recognized pregnancies of all gestational periods as reported by women in the 1995 National Survey of Family Growth conducted by the National Center for Health Statistics. The rate of fetal loss depends on the degree to which losses at very early gestations are detected.

⁵Includes all persons of Hispanic origin of any race.

NOTES: Due to rounding, figures may not add to totals. Rates for 1990–91 have been revised on the basis of information from the 1995 National Survey of Family Growth (NSFG). The revised estimates differ, therefore, from those previously published (see Technical notes and reference 4).
