## LETTER TO ALL INTERESTED PARTIES

**SUBJECT: National Institute for Occupational Safety and Health Announcement of a Public Meeting to be held on April 29, 2003, to Continue Conceptual Discussions for Escape Respirator Standards Development Efforts Used for Respiratory Protection Against Chemical, Biological, Radiological, and Nuclear (CBRN) Agents**

The National Institute for Occupational Safety and Health (NIOSH), National Personal Protective Technology Laboratory (NPPTL) is planning to conduct a public stakeholder meeting on April 29, 2003, from 9:00 a.m. – 5:00 p.m. at the Radisson Hotel Pittsburgh Green Tree, 101 Radisson Drive, Pittsburgh, Pennsylvania.

The purpose of the meeting is to continue conceptual discussions of concepts being considered for CBRN Escape Respirator standards and review research efforts to identify simulant materials for use as CBRN test surrogates for respirator research and development efforts. NIOSH, along with the U.S. Army Soldier and Biological Chemical Command (SBCCOM) and the National Institute for Standards and Technology (NIST), will present information to attendees concerning the concept development for the Escape Respirator CBRN standard. Participants will be given an opportunity to ask questions and to present individual comments for consideration. Interested participants may obtain the latest copy of the Escape Respirator CBRN concept paper, as well as earlier versions of the concept papers used during the standard development effort, from the NIOSH contact identified below, or from the NIOSH National Personal Protective Technology Laboratory web site, address: <http://www.cdc.gov/niosh/npptl>. The April 15, 2003, concept paper will be used as the basis for discussion at the public meeting, as well as forming the basis for the new Escape Respirator CBRN statement of standard.

Recent acts of terrorism have created an urgent awareness of domestic security and preparedness issues. Municipal, states, and federal responder groups, particularly those in locations considered potential targets, have been developing and modifying response and consequence management plans. Since the World Trade Center and anthrax incidents, most emergency

response agencies have operated with a heightened appreciation of the potential scope and sustained resources requirements for coping with such events. The federal Interagency Board for Equipment Standardization and Interoperability (IAB) has worked to identify personal protective equipment that is already available on the market for responders' use. The IAB has identified the development of standards or guidelines for respiratory protection equipment as a top priority. NIOSH, NIST, National Fire Protection Association, and the Occupational Safety and Health Administration have entered into a Memorandum of Understanding defining each agency or organization's role in developing, establishing, and enforcing standards or guidelines for responders' respiratory protective devices. NIST has initiated Interagency Agreements with NIOSH and SBCCOM to aid in the development of appropriate protection standards or guidelines. NIOSH has the lead in developing standards or guidelines to test, evaluate, and approve respirators.

NIOSH, SBCCOM, and NIST have hosted public meetings on April 17 and 18, 2001; June 18 and 19, 2002; and October 16 and 17, 2002, presenting their progress in assessing respiratory protection needs of responders to CBRN incidents. The methods or models for developing hazard and exposure estimates, and the status in evaluating test methods and performance standards that may be applicable as future CBRN respirator standards or guidelines were discussed at these meetings.

Interested parties should make hotel reservations directly with the Radisson Hotel Pittsburgh Green Tree (412-922-8400 / 800-333-3333) before the cut-off date of April 21, 2003, referencing the NIOSH/NPPTL Public Meeting. Interested parties should confirm their attendance to this meeting by completing the enclosed registration form and forwarding it by fax (304-285-4459) to the Event Management Office, or obtaining an electronic registration form from the NIOSH Homepage ([www.cdc.gov/niosh](http://www.cdc.gov/niosh)) by selecting Conferences, event, and then e-mailing ([confserv@netl.doe.gov](mailto:confserv@netl.doe.gov)) the form to the Event Management Office.

Requests to make presentations at the public meeting should be mailed to the NIOSH Docket Officer, Robert A. Taft Laboratories, M/S C34, 4676 Columbia Parkway, Cincinnati, Ohio 45226, Telephone 513-533-8303, Fax 513-533-8285, E-mail [niocindocket@cdc.gov](mailto:niocindocket@cdc.gov). All requests to present should contain the name, address, telephone number, relevant business affiliations of the presenter, a brief summary of the presentation, and the approximate time requested for the presentation. Oral presentations should be limited to 15 minutes.

After reviewing the requests for presentation, NIOSH will notify each presenter of the approximate time that their presentation is scheduled to begin. If a participant is not present when their presentation is scheduled to begin, the remaining participants will be heard in order. At the conclusion of the meeting, an attempt will be made to allow presentations by any scheduled participants who missed their assigned times. Attendees who wish to speak but did not submit a request for the opportunity to make a presentation may be given this opportunity at the conclusion of the meeting, at the discretion of the presiding officer.
