Re: Technical Conference
Meeting in Morgantown, January 9-11, 1991

Dear Dr. Amendola:

The Jefferson Group respectfully requests an opportunity to speak for approximately ten minutes. Barry J. White, a Vice President of the firm, will make the presentation.

Our comments will support the concept of simulated workplace testing for respirators, in addition to laboratory testing, if the parameters of such a workplace can be carefully defined so that results can be verifiable and reproducible.

For contact purposes and the coordination of our participation, please address all contact to:
