This whole program is taking far too long to complete, I keep track of the claims coming in and there was to be a phone interview process started in January and here it is the end of February, again I say are you prolonging this so that the individuals die and never see their benefit, I say again that this country can give money and supplies to foreign nations in days but the American worker who died due to his job has to be on hold because it appears this is simply guess work and it appears that alot pf time is just being wasted , please complete this process so the benefits are awarded within the next 30 days this program has been in process too long and you are being unfair to the worker and the survivors.
