Welcome and roll-call/introductions

WG Discussion

1. Discuss petition and site profile issues matrix

SC&A summarize issues; DCAS respond; WG discussion and agreement on action items:

- Adequacy of internal dose records (including Davis & Strom methods)
- Adequacy of external dose records
- Completeness of monitoring/need for co-worker models
- Contamination and egress monitoring
- Operations and monitoring during the 1967 facility conversion
- Reconstructing radon and thoron doses
- Reconstructing recycled uranium (RU) doses
- Reconstructing neutron doses
- Reconstructing doses associated with exposures at quarry and raffinate pits
- Occurrence and significance of off-normal conditions and high or unusual exposure incidents
- Extremity and close work exposures (badge geometry issues)
- TBD Issues (pages 12-22 of combined issues matrix): discuss as time allows

2. Recap action items and discuss timeframe

3. <u>Schedule next work group meeting if feasible</u>

Adjourn
